Peptide of Interest

Editing of *Lactococcus lactis* proteolytic system
to increase its bioactive potential

Chenxi Huang

The work described in this thesis was performed at the Department of Molecular Genetics, Faculty of Science and Engineering, University of Groningen, the Netherlands. The work was financially supported by the China Scholarship Council.

Printing of this thesis was financially supported by the University of Groningen and the Graduate School of Science.

Peptide of Interest

Editing of *Lactococcus lactis* proteolytic system
to increase its bioactive potential

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Tuesday 17 November 2020 at 09.00 hours

by

Chenxi Huang

born on 03 December 1990
in Hubei, China

Supervisors

Prof. J. Kok

Prof. O.P. Kuipers

Assessment Committee

Prof. A.J.M. Driessen

Prof. I.J. van der Klei

Prof. E.J. Smid

Table of contents

Chapter 1	General introduction	7
	Comprehensive Review of Bioactive Peptides Encrypted in Bovine β -casein and Their Liberation by Lactic Acid Bacteria	
	Thesis outline	28
Chapter 2	<i>L. lactis</i> proteolytic system	39
	Editing of the Proteolytic System of <i>Lactococcus lactis</i> Increases its Bioactive Potential	
Chapter 3	A special peptidase	75
	Lysis of a <i>Lactococcus lactis</i> Dipeptidase Mutant and Rescue by Mutation in the Pleiotropic Regulator CodY	
Chapter 4	CRISPRi platform for <i>L.lactis</i>	103
	Plasmid- and Genome-based Inducible CRISPRi Platforms in <i>Lactococcus lactis</i>	
Chapter 5	A real case: applying CRISPRi in <i>L.lactis</i>	125
	Another Breaker of the Wall: The Biological Function of the Usp45 Protein of <i>Lactococcus lactis</i>	
Chapter 6	Summary, General Discussion, and Future Perspective	155
	Appendices	
	中文总结	166
	Nederlandse Samenvatting	169
	Acknowledgments	172
